

What Is Align[®]?

Align is a patented, daily dietary supplement that comes in an easy-to-swallow capsule that you take just once a day, each day, to help restore your natural balance with ongoing probiotic protection.*†

Like many dietary supplements (but unlike some foods sold as probiotics), Align is calorie-free and lactose-free, and does not need to be refrigerated.

How Does Align Work?

Not having enough beneficial bacteria in the digestive system can lead to a digestive imbalance. Occasional upsets also can be caused by changes in your schedule, diet, stress, travel, or other factors. By delivering healthy bacteria, Align helps restore your natural balance and brings peace to your digestive system.*

Who Should Take Align?

Align is intended for people with healthy digestive function who are looking for help with occasional digestive upsets or who are interested in promoting their digestive health.* With Align, you can reclaim your freedom to travel, eat out, and enjoy life without the same interruption of these occasional digestive upsets, and help restore the natural balance of your digestive balance.*

What to Expect from Align

Align delivers Bifantis[®], a probiotic, to your digestive system with the very first capsule. If you take Align once a day, each day, you can help build and maintain a strong, healthy digestive system.* To get off to the right start, be sure to sign up for My Align Advisor[®]. This weekly email contains tips to help you along your journey to healthy digestion, and includes recipes and other information to help you get the most out of Align. Keep in mind that everyone responds to Align at a different pace, so be patient, and for best results, keep taking Align daily.

Where Can I Get Align?

You can purchase Align online, in stores nationwide, or by calling (800) 208-0112.

† When used daily as directed
